CARE AND MAINTENANCE OF ARTCRAFT GRAPHICS PRODUCTS

All signage needs regular cleaning. This should be performed with a soft, clean cotton cloth and a mild, non-abrasive cleanser. Graffiti can be removed with isopropyl alcohol or methyl hydrate, available in the paint section of your local hardware store. This should then be cleaned with soapy water.

Framed signs should be disassembled annually and cleaned thoroughly to remove dirt, bugs and mould. Let dry thoroughly before reassembling. Polycarbonate facials can be inexpensively replaced if vandalized.

Badly damaged signs can be returned to Artcraft for reuse or recycling.
